Fasting and Admission Instructions

Patient: _____

Procedure Date: _____

Drop Off Time: _____

Instructions:

For their safety, your pet will need to be fasted for their procedure. **Please withhold all food beginning at midnight the night before the scheduled procedure. Water can be offered until 2 hours prior to drop off at the clinic.** If your pet is on **oral medication**, do not give it the morning of the procedure unless directed otherwise. If we have dispensed medication for the night before and morning of surgery please give as directed.

When you arrive at the clinic we will get an assistant or technician to come out and greet you. Please expect to be at the clinic for 15 minutes at drop off as we will have a few questions for you and paperwork to sign. We will ask you to leave a phone number you can be reached at throughout the day in case the doctor has any questions for you prior to or during the procedure.

Once your pet has been checked into the clinic they will be made comfortable in a cozy kennel and supervised closely. All pets being sedated will have a pre-sedation exam performed.

The doctor performing the procedure will give you a call once all procedures for the day are complete to let you know how your pet is doing and give you an estimated pick up time. Pickup time for your pet will vary though we usually see pets go home between 2:00pm and 5:00pm. We will be closing at 6:00pm so the latest pick up time available is 5:45pm.

If your pet was given sedation we will send you home with thorough post-operative care instructions for your pet along with any necessary medications.

As always, if you have any questions or concerns please reach out to us via phone or email at your convenience.

Thank you for trusting us with your best friends care.
